### **NOIZ 666999 ZION**

- [Track 01](#): Babylon Massacre
- [Track 02](#): Columbia Interstate
- [Track 03](#): Deformed Bauhaus
- [Track 04](#): Knochenhauers Jadestahl
- [Track 05](#): Mona Lisa Overdrive
- [Track 06](#): Murunda DPA O Mimatala AKG U
- [Track 07](#): N plus Eins

## memorandum

9 June 1993

Z-043-93

Z  
PLS FORWARD TO ADMIRAL  
STUDEMAN FOR INFO.CIA KRYPTOS Sculpture - Challenge and Resolution (FOUO)  
INFORMATION MEMORANDUM

DIR M

D/DIR MM, EXEC/DIR DD, DDOGreat!  
Story!

1. (FOUO) The KRYPTOS sculpture, located at the entrance and the courtyard of the new CIA headquarters, consists of a series of stone "pages" containing text which begins as International Morse and increases in complexity as the stonework extends into the courtyard. Inserted between these stone "pages" is a flat copper sheet engraved with letters and symbols - the enciphered message - that is the focus of this challenge.

2. (FOUO) In November, a cadre of cryptanalysts assigned to group enthusiastically responded to the challenge. Within one month, three of the four cipher systems used to encrypt the sculpture's plain text had been diagnosed and completely exploited. The cryptographies employed for the encryption of these three parts involved two periodic polyalphabetic substitution ciphers and a keyed umnar transposition cipher. The exploitation of the sculpture's first three parts constitutes a readability of approximately 89%. The final 97 characters continue to elude solution.

3. (FOUO) Attached, for your review, is a brief description of the employed cryptographies and the plain text derived from the three exploited portions of the KRYPTOS sculpture. If your schedule permits, we would be happy to present a 15-minute briefing on the KRYPTOS sculpture solution and introduce you to the cryptanalysts responsible for the success against this cipher.
